

NSCA Certified Instructor Contract

I will follow the NSCA Instructor Certification lesson plan and meet all objectives of this plan. I also agree to allow NSCA to conduct a personal federal background check. Most specifically, I will insure that each instructor I certify will be able to perform the following:

- A. Be able to control all aspects of gun safety to include muzzle control, loading and unloading of firearms and the safe movement of firearms from one station to another.
- B. Be able to verbally communicate the NSCA teaching methods.
- C. Be able to call a shot. A certified instructor must be able to tell a student if they are behind, over, under or in front of a target in order to correct these problems.

I understand and fully support the revocation of my instructor certification privileges if I am unable to follow and meet course objectives and if instructors certified by me are unable to meet all objectives of the lesson plan. I further understand that once my certification privileges have been revoked that I will not be reinstated until I have successfully completed remedial training with the NSCA Chief Instructor.
